Work Experience

Research Intern ([Research paper](#))

Dept. of Physics, Shri Ramdeobaba College of Engineering and Management, Nagpur

07/2023 – 11/2023

- Investigated lanthanide-sensitized luminescence in Sr_2CeO_4 for advanced optical applications.
- Leveraged solid-state synthesis to optimize VIS & NIR energy transfer in photonic devices.

AI-ML Virtual Intern ([Certificate](#))

AICTE EduSkills — Google for Developers

04/2024 – 06/2024

- Completed a 10-week AI-ML virtual internship with exposure to Python, ML concepts, and data-driven workflows.
- Worked on foundational AI problem-solving, data analysis, and practical AI/ML applications.

Personal Projects

Automation Framework (Selenium WebDriver, Cucumber BDD) - Veeva Systems ([GitHub Repository](#))

- Built a scalable web UI automation framework using Java, Selenium, Cucumber, Maven, and POM with cross-browser and data-driven testing support.
- Automated end-to-end e-commerce test scenarios with assertions, logging, reporting, and screenshot-based failure tracking.

Multimodal AI Agent for Healthcare Diagnosis ([Live Project](#))

- Engineered a Python-based voice interaction framework using Speech-to-Text, Text-to-Speech, and a Gradio interface for real-time dermatological Q&A.
- Designed low-latency audio I/O pipelines with FFmpeg and PortAudio for seamless bi-directional voice communication.

Credit Card Fraud Detection ([Github Repository](#))

- Built a fraud detection model using Logistic Regression, Random Forest, and XGBoost to detect fraudulent transactions.
- Applied SMOTE and feature engineering to handle class imbalance and improve model performance.
